So actually this product ends up having two separate ratings for me. First, in a practice situation it performs very well. Its very easy to record a rhythm track to compose melodies or solo over, especially when you use the count in function which gives you a measure of the drum beat before starting to record. I use an octaver to record a bass line then the rhythm guitar track and Im ready to go. To take it a step further you can load a full composition onto the pedal, minus the parts you want to play yourself. Achieving the right loudness takes a couple of tries but once you get it, you can save it as a one shot meaning it will play once in its entirety and stop, instead of like loop. Very useful. So, I give this pedal five stars as a practice tool. Now onto a live situation. If you use it to play uploaded backing tracks for a small gig that doesnt require a lot of volume it will sound decent if your mix was done well. If you use the pedals drumbeats live, your music will sound way too repetitious and artificial due to the simplicity and the sound quality of the beats. Furthermore, if you like to improvise or switch around the order of the parts of a piece or create a piece in a live situation, this pedal is too limited and does not possess the option of recording various independent tracks over the same beat that you can switch between. So thats why I would give it four stars for live use. Of course this doesnt stop it from being a great practice tool and jamming companion that

wont give you attitude or empty your fridge every time he comes over. But seriously, your guitar playing and creativity will definitely improve with this looper. That alone makes it worthwhile. Send report Total handling features sound quality Boss RC3 Stratcat, 25.07.2017 This is a great looper. Some nice features without being too complicated. Clean bypass. Instant connection to windows 10. Done correctly, you will get a clean bypass. Done incorrectly, you will not.  
<http://www.iccj.jp/images/uploads/fckeditor/control-systems-engineering-nise-solutions-manual-5th-edition.xml>

Now, that might all seem more complicated than; Guitar Boss RC3 Guitar amp but if you are using this with an audio interface and get the chain order wrong, your looper pedal will not operate correctly. You will easily know when the chain order is wrong because you will not have clean bypass. Important, because I see many people complain about noise problems, not realising they have their setup chained incorrectly. Hope this helps. The pedal itself, is another Boss masterpiece. Send report Total handling features sound quality Best looper on the market for 2 PARTICULAR applications. FARROKH, 25.03.2014 In my opinion this is the best looper pedal on the market for these two PARTICULAR applications 1 This pedal can record up to 3 hours without needing any external memory card and it has 99 different slots for PERMANENTLY saving your recordings loops and turning the pedal off. Sometimes, you are playing at night or in a tour bus or in a rehearsal, gig, etc and you are not next to your computer, but an idea suddenly jumps into your head maybe a nice riff, or a rhythm, or some chord progression, and you really want to record that thing before you forget it. That has been a precious spontaneous thing that has happened and you want to save it. This pedal is really nice for composers and guitar players. Many nights, my computer has been turned off and I was improvising, an idea just emerged, and I have been able to record it as easily as possible with this pedal, turn it off and go to sleep relaxed! 2 I have read many players even professional players like Billy Gibbons of ZZ TOP, record their whole live performance for different reasons. This pedal can record up to 3 hours continuously, so you can record a whole live performance. If you have recorded your clean signal, you can later reamp the signal and use it for different purposes.

But also, I have found it very nice for practicing When I am ready and have learnt a full song, I play the whole song and record it not just a tiny part, and after that I listen to it, try to focus and find and correct only those parts that are not good. This is much easier than sitting in front of computer and recording with that. Many famous pedals on the market like ditto, etc cannot permanently store and record 99 songs. Send report Total handling features sound quality A must have for creative playing 28.02.2015 The Loop Station has a wide range of usage areas. It is not necessarily the perfect fit for any pedal board when playing with a band, but it is absolutely invaluable when it comes to practising, writing songs and experimenting. You'll find that you'll get another dimension of your at home guitar playing as you have the possibility to instantly play along with your own stuff. The interface is impressive, as some clever designer really has figured out how to cram a LOT of functionality on just a few inches, controlling the essentials with your foot only and the more detailed settings with the smaller buttons. Don't let the familiar BOSS pedal appearance fool you this is something completely different that something you basically just turn on and off. I've mostly been using this on a smaller practice amp at home, and it works fine. However, you may need to finetune your volumes and tone settings a bit to avoid getting ugly compression overload when you record multiple layers. It seems to work good with both valve and nonvalve amps though. Don't get discouraged by the slightly advanced concept if you've never used a loop pedal before just spend 5 minutes with the manual the only pedal in the world that needs it probably and you'll get a hang of it just fine. Using a loop pedal live can be a cool technique, and can be taken to great lengths with some practise.

<https://congiendisan.vn/vi/3m-dynatel-965dsp-user-manual>

This pedal definitely gives you all of your looping needs, but if you are experienced and aiming for a full on one man band, it might be wise to invest in something even more advanced. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. D Wisperer 5.0 out of 5 stars My first impressions upon the purchase. Functionality is basic, but for anything more sophisticated there are bigger boxes which can do more. And for anywhere outside street busking, there are computers and programs that can do a lot more. The slightly more difficult part smooth onstage operation and performance comes with practice and I haven't had the time for that yet.

But in the first minutes of owning the RC1 I was confidently recording loops and having fun jamming with myself, it's that simple. In addition to the included printed instructions, there are many online videos that show how to use it and provide great ideas of what can be done. I am perhaps satisfied because I didn't expect miracles, already knew exactly the capabilities of this unit, and the experience fully met my expectations. Any disappointed users I have come across simply had unrealistic expectations because they had not made the effort to research the product in advance. Yes, it's basic and limited but within its limitations, the possibilities are nonetheless. Firstly, there was a battery already in the pedal so I was up and running straightaway. The instructions for use are clear and, after a couple of goes at synching my playing with my pressing of the pedal, I was away. It does exactly as it says. There is unlimited dubbing although you'll end up with a wall of sound with too many. My first real effort was Breathe of Dark Side of the Moon. It was really easy to add the slide guitar over the chord sequence and it allowed you leeway to add a couple more for effect. I was impressed with the reproduction of the guitar and, with a bit of twiddling with the level, the balance can be made. I haven't added the bass guitar but I've no reason to believe that would present a problem. The only downside is the storage i.e. one loop can be stored. However, by running through my PC, I can record and then edit. The loop indicator dial is inspired and makes the whole process a lot more intuitive. Highly recommended for those new to the world of loop effects pedals. Summary If you want a tool to help improve timing, record melody ideas, mix up your practice sessions or even gig with for me that may take lots more practice BUY THIS WITHOUT DELAY!!!! The basic operations of a looper are intuitively easy to use and recordings sound good, as long as the amp is setup correctly i.e.

[www.luminicaambiental.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626f1273deb10---bosch-sgs56e02gb-manual.pdf](http://www.luminicaambiental.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626f1273deb10---bosch-sgs56e02gb-manual.pdf)

either wired into the effects loop if present or the amp effects are all turned off. I see that both modes have merit in some situations and it would be nicer if switching between would be easier and documented in the manual. A create feature is the USB connection to save and load tracks. I have converted a few songs to 16bit WAV and loaded them into the looper at memory locations 80 to 89 which now makes playing along with them very easy. I am using a PC running Linux XUbuntu 16.04 to connect to the loopers USB port and it works flawlessly. Verosimilmente Progettato da chi lo usa, e possibile registrare e mandare in loop un pezzo sia tramite uno strumento che tramite un microfono anche contemporaneamente grazie al suo doppio ingresso. Possibilita di registrazione in tempo reale

multi traccia, mandando in play il brano precedentemente registrato. Preciso negli attacchi e facile da imparare. Il brano può essere interrotto in varie modalità immediata in dissolvenza alla fine del brano oppure essere eseguito una sola volta senza loop. Elencare tutte le capacità è impossibile, sono veramente tante le modalità basta solo tanta fantasia e un po' di pratica. Sorry, we failed to record your vote. Please try again Dazu gibt es 10 Drumloops in variabler Geschwindigkeit und 5 Effekte für die Loopspuren Die Effekte sind wenig wert, weil sie nicht editierbar oder in der Intensität regelbar sind. Es gibt Lautstarke Sprünge beim Umschalten. Der Mikrofoneingang hat keinen Lowcut Filter oder EQ aber Phantomspeisung! Die Fuschalter sind nur mit viel Gefühl leise zu betätigen und bei der Mikro Aufnahme dann mit drauf Die aufgenommenen Loops sind in Geschwindigkeit und Tonhöhe fest und nicht editierbar. Die Mischbedienung mit Hand und Fuschalter im selben Gehäuse ist extrem nervig. Man drückt dann immer auf dem verfuckt und verstaubt am Boden liegenden Ding herum. Fazit. Die Effekte sind für die Tonne und der Mikrofoneingang ist ohne EQ wenig wert.

Bleiben auf der Haben Seite 2 Loopspuren und 10 Drumloops. Ich finde dafür viel zu teuer. Sorry, we failed to record your vote. Please try again Suono da solo da tanti anni, mai però in un gruppo. È un pedale fantastico, mi dispiace non averlo comprato 10 anni fa. Non serve imparare ad usarlo, basta avere il ritmo nel sangue o nella testa e viene via da solo. Ti registri la base, ti registri le varie parti e poi ti diverti con le scale e gli assoli, senza mai fermarsi. Funzionalità a parte è un boss, quindi un blocco di metallo semi indistruttibile. Cromato che nemmeno una macchina sportiva. Vale ogni centesimo speso. Sorry, we failed to record your vote. Please try again Great tool to improve my playing. The shipping was very long, tracking stopped at one time. I was under impression that it was shipped from a Canadian supplier and to my big surprise I had to pay duty of half the price of the looper too bad Sorry, we failed to record your vote. Please try again Nach ein paar wenigen Tagen der Eingewöhnung, kann man sich wunderbar selbst begleiten. Ich möchte jetzt nicht die Funktionsweise erklären. Jeder der sich dafür interessiert, sollte wissen wie ein looper funktioniert. Ein Netzteil sollte extra gekauft werden. Das ist aber leider typisch bei BOSS. Ich finde diese LoopStation wirklich toll. Sie ist robust, schwer, rutscht nicht so leicht hin und her und hat schon knackige Pedale. Wer Bock drauf hat und mit zwei Spuren auskommt, der sollte nicht lang überlegen und zuschlagen! Sorry, we failed to record your vote. Please try again Figured out how within the first 5 minutes playing around with it. Click to start your loop, click again to end the loop and start it looping. Click again so it's green and you aren't overdubbing. Keep doing what you're doing. If you want to overdub at any point click it again, and again when you're done. If you don't like the overdub hold it down for a couple seconds and it clears it.

If you want to erase everything and start over hold it down for a few seconds while it's just green. To be honest I only dubbed in 4 layers to test it, so I don't know how many layers you can add in but I plan on finding out. Sorry, we failed to record your vote. Please try again Il primo è la scarsa usabilità dell'oggetto che non è sufficientemente intuitivo comunque senza un vero display è difficile, la seconda è la mancanza del trasformatore, che, visto il prezzo d'acquisto, dovrebbe essere compreso. Lo uso con una pila 9v ricaricabile, per abbattere i costi dei consumi. Consigliato solo per esercitarsi. Sorry, we failed to record your vote. Please try again Very easy to control and with my big Shrek feet, there is no breaking the small silver switch that you would see on other looper models on the market. KUDOS to BOSS for another job well done. Later on I may even opt for one of the upscaled more current models that allow for recording and saving of live tracks on stage via USB for home recording purposes. Cheers !! Sorry, we failed to record your vote. Please try again Applica gli effetti non allo strumento ma alla registrazione. Così è inutile. Ma l'apparecchio è davvero di qualità e robusto. Sorry, we failed to record your vote. Please try again Tres simple a l'utilisation de base. Un peu plus complexe si on veut modifier des paramètres. Peut utiliser avant les effets ou après. On peut enregistrer la ligne de basse en premier, puis ajouter une rythmique par dessus et enfin faire se solo par dessus, cool. La pédale garde en mémoire le montage même coupé, mais tout

sefface si vous refaite lenregistrement de scequence depuis le debut. Pas de memorisation de plusieurs jeux possible. Cest le modele au dessus. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote.

Please try again La ben piu economica pedaliera multieffetti Zoom G1Xon, per esempio, offre tra le proprie funzioni una limitatissima loop station di pochi secondi ma una campionatura di rhythm molto piu vasta e piu piacevole per lorecchio. Sorry, we failed to record your vote. Please try again Sicuramente vale il suo prezzo Sorry, we failed to record your vote. Please try again Por ponerle una pega, las pilas venian gastadas. El precio ne parece un poco caro, hay que tener en cuenta que aunque tiene mucha calidad de sonido, es muy basico, facil de utilizar, graba y reoroduce en bucke, pero ya esta. Deberian incluir el adaptador. Sorry, we failed to record your vote. Please try again I like the phantom power feature and the option to have the instrument and mic available for looping. The DrumMachine is basic but good enough for guidance. I really like you can change the speed on the saved loops and keeps the original pitch. Lots of good online videos or musicians showing up damn good skills on the pedal. the learning curve will be a challenge but is fun to figure it out. Overall I give the 5 start because this looper is too much fun and good quality Sorry, we failed to record your vote. Please try again. Compared to its much bigger brothers, the RC30 and the RC300, this looper is limited on features, but its portability at least makes up for that fact. The RC3 Loop Station easily holds its own, both in features and price, compared to its bigger siblings. Let's break this review down by asking a few of the most common questions about the RC3 This is actually very helpful, and not as intrusive as it sounds for the most part it is genuinely helpful. But is it good enough to use as a phrase looper whilst you're playing live However, for solo musicians, this pedal really can be a godsend, especially for postrock or "arty" players the potential to create soundscapes well beyond the scope of a single musician really is limitless.

We know that the cellist Zoe Keating uses phrase looping during her performances, and we wouldn't be at all surprised to see an RC series looper beneath her toes. A couple of options help the RC3 suit itself to your preferences; AutoStart functionality can make it so the pedal only starts looping when you start playing, rather than hit the pedal. If you're playing reggae or especially offbeat chops, this could be a little problematic, or if your line is especially noisy this could also be a problem. Best to experiment. The RC3 also offers autorerecord or plain playback looping, meaning that you can choose between layering another pass as soon as you've finished recording the first take, or just playing the recording back. You'll find yourself changing this setting relatively often, depending on the song you're playing at least, I do so it is nice to have the option. It's not so easy you won't need to put hours and hours of practice in though I recommend introducing it in the practice space to see whether your live act will work with a looper. You can create unique changes and really get outside of your own head by looping a basic idea and then throwing some uncharacteristic chords at it. With the aux in jack and the ability to slow loops down without changing pitch, you've got a formidable practice tool in the RC3. Due to the previously mentioned autorerecord, quantise and start options, the pedal can quickly and comfortably be figured out. With its USB out, aux in and 99 memory banks including 10 backing tracks loaded onto patches 9099 this pedal could be all the loop station you ever need. The bigger loopers have got more features than the RC3, of course both the RC30 and RC300 have effects you can add to each loop, but we can't think of a practical use for them. Sell your other pedals, dog or mother in law to be able to afford one. Then you need a Skinny Little Twins. Facebook Twitter Pinterest Tumblr WhatsApp Email Likes creating music and VeinTap.
