MAILIN SERVICE is a program under which your Product is repaired by a Canon U.S.A. or a Canon Canada authorized service center for the Product. You will be given the name, address and phone number of an authorized service center. It is your responsibility to properly package and send the defective Product, together with a copy of your dated proof of purchase, a complete explanation of the problem and a return address to the authorized service center at your expense. Do not include any other items with the defective Product. The Product covered by this limited warranty and proven to be defective upon inspection will be repaired and returned to you without charge by the authorized service center. Any Product received by the authorized service center that is not covered by the limited warranty will be returned unrepaired, or at the discretion of the authorized service center, you may receive a written estimate of repair at such cost as the service center may establish from time to time. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. jj2me 5.0 out of 5 stars But its a keeper. The number one feature of this camera is its size for such quality images. A friend with a larger digicam agreed, saying his next camera would be a small one like this that he could have with him always. It is also very easy to use. After reading the review at Photoxels.com, with their discussion about histograms, I keep it in auto mode, and check the histogram I set the review details to show for 10 seconds. If the viewed picture or histogram tell me to reshoot, only then do I go into manual mode and adjust. Have only had one bad shot indoors with flash, came out with shirt color off, but that was one of my first pictures when I was playing, so I may have done something wrong, plus it was set at the default fine compression, rather than the better quality superfine compression, which I now use. I thought I might want the Sony DSCT1 for its optical zoom, but the early reviews of the Sony said indoor photos came out badly. And the Sony is bigger 114.66 cubic cm vs. 78.52 cubic cm. I keep this thing in my shirt pocket most of the time. Dont think that would be likely with the Sony. Also, the Sony needs its docking station to be able to connect to a TV, so it becomes even less portable. Although Amazon didnt advertise it, I was pleasantly surprised to receive the case. You cant use the case for shirtpocket use, though too bulkyIm using a little cloth drawstring bag for that. But when its not in the pocket, the case seems to add some protection from bumps. Its made for belt attachment. Other than the lack of optical zoom, which I will accept in trade for the small size with quality 4MP pics, I have no complaints.

Its been perfect for me, with full auto mode working exceptionally well point and shooshoot i.e., shutter down halfway to focus, then down fully. Result has always been great pictures.I always use Amazon for the reviews which I read before making a buying decision and I was not disappointed. The unit is great. I just returned from Hawaii and took many pics in varying light situations and they all look super. Colors are vibrant and properly rendered. I agree that red eye is a problem though. Being middle aged, I would have appreciated a bigger screen. That is the single largest drawback for me. I bought an extra battery and recommend that you do so if you are like me and hate to be caught short. However, I do have to say that the battery life has been good. I also popped for a 128SD memory card and found that to be more than enough to capture the 90 pics taken in large size superfine shooting format. My unit came with a very nice leather case that uses Velcro to secure the case to a belt loop. I found this to work very well and it did not interfere with getting to the camera quickly. I generally shoot pics with a 35MM NIKON 6006 SLR so you could say that I am an experienced photographer. Take it from me; youll like this camera and the results you achieve.I love a camera that you can just throw in a pocket and forget you even have. I had a logitech pocket cam but the pics were just terrible, so I went after this canon. Well first impression was what quality. Its metal construction and sleek look wows you imediatly. But the real wow comes when you see the pictures it takes, They are flawless. I have a canon A80 and let me tell you these pics are as good if not better than that. OK, It has no Opitical viewfinder or zoom, But who uses viewfinders anymore anyhow, We all use the lcd screens to take our pics.As for the zoom, If thats what you want youll have to sacrifice size then.

Bottom line is if you want a super small high quality camera that takes great everyday pictures then this is your baby. Battery life is superb, I took over 80 pics and still have juice.I almost made the mistake of getting the Casio because it is so tiny, but reviewers said the 4MP Casio was a complete

sham more like 2MP so I got this one instead. Very glad. Night mode is excellent and everything else is Elph quality basically what youd expect. Takes great pictures Nevermind the Sony T1 either, bad photos. Get the canon! This camera rules. You may find documents other than just We keep our list of direct Canon PowerShot SD10 driver and firmware links uptodate so they are easy to find when you need them. Just hold it in the Cool is daring. The 4 megapixel PowerShot Five is fabulous. Presenting the first Iridescent White, Bronze or Silver. PowerShot palm of your hand and wait for the S410 Digital ELPH stands out with its 5 megapixel Digital ELPH. Engineered to SD10 Digital ELPH celebrates cuttingedge compliments. Silver White PowerShot streamlined design and quick, intuitive capture every detail with exquisite style and performance wELPH cameras designed to impress HighQuality Lens Movie Mode with daringly sleek good looks. These ultracompact cameras are even more Switch to Movie Mode and enjoy movies with sound up Totalperformance versatility. The body of Canon's IXY DIGITAL L employs front and rear panels made from a newly developed aluminummagnesium alloy, which realizes exceeding durability while enabling a lustrous surface finish. Binding the front and rear panels is a single Ushaped piece of stainless steel which, forming three sides of the camera, contributes to striking aesthetics while also providing outstanding structural support.

Photographic performance is enhanced by such features as a Super Macro Shooting Mode, which enables autofocus macro shooting from a distance of 3 cm and a photoimage area of up to 24 mm x 18 mm; a Quick Shooting Function, achieving an almost lagfree shutter response to ensure that photo opportunities are not lost; and a 5point AiAF focus system with selectable singlepoint center focus. Other handy features offered by the IXY DIGITAL L include Watch Mode, which displays the time in the camera's LCD monitor; Silent Mode, eliminating all sounds other than alert tones; and Display Off Mode, which automatically switches off the LCD monitor after a certain period of time for reduced power consumption. Slow shutter speeds of 1.3 second or slower operate with noise reduction. It has an ultracompact metal body which Canon, a leader in photographic An optional allweather Like 0 Dec 30, 2011 permalink Read our full review to see why its got the best autofocus system weve ever seen. 716 Olympus OMD EM10 Mark IV initial review first impressions Aug 4, 2020 at 0600 The Olympus OMD EM10 IV is the companys entrylevel DSLRshaped mirrorless camera. While it has a higher resolution sensor and new processor, its biggest focus is on selfies. 2258 Sony a7S III initial review Jul 28, 2020 at 1400 The Sony a7S III is a 12MP fullframe camera primarily designed with video in mind.
